The ai runtime selectors need to be adaptable to suit chat tts text to video ifc generation and whatever else is needed in the future

Why is it showing offline (local) possibly where the main window is pulling this from

Settings

AI Runtime

Chat Mode: Offline (Local) ▾   TTS Mode: Offline (Local) ▾

☑ Dark Mode

we need one of these for chat tts and whatever else is needed in the future

LLM Model: llama3:latest ▾

Voice: leo ▾

TTS Device: Auto (Safe) ▾   **Check GPU**

☑ GPU Ready: NVIDIA GeForce RTX 5090 (sm_120)

Close

This isnt just for the tts its also for all of the llm modules

Main window

ORCA Control

Runtime: ● Chat: offline TTS: offline   9:54:12 am (Monday, Australian Eastern Standard Time)   Location: enabled (coarse)

Nees to be populated from settings
